

Price checker

PRICE CHECKER module

Many retailers have changed their labeling methods to eliminate tags from individual products. This means that a customer may have taken a product from a shelf without really looking at the price.

If the customer later wants to verify the price he either returns to the shelf, asks a clerk, or uses a price checker to find the price.

By installing price checkers on end of aisle positions you are providing a needed service as well as reducing the time spent by clerks checking prices for the customer.

LOGIVISION

210 Laurier, Beloeil, Quebec, Canada J3G 4G7
Tel : 450. 464.2131 Fax : 450. 464.5673
