PUMP INTERFACE

Our fuel management solutions provide control for both in-store and pay-at-pump fuel transactions.

The gas pump interface includes buttons that control all fuel related transactions and eliminates the need for a separate pump controller in the store.

POS terminals interact in real-time with the gas pumps using forecourt controllers that connect to the major dispenser brands.

The complete solution will optimize operator efficiency and includes fuel movement reports to help manage store operations.

LOGIVISION

Tel : 450. 464.2131 Fax : 450. 464.5673

System features include:

Full function POS

- Complete POS system for c-store, grocery store or service station selling fuel
- Pump control functions are available from each POS terminal
- Claim and restore transactions from/to any POS terminal
- Programmable screen layout allows adding preset items and adapts to number of pumps
- Pre-paid transaction support
- Real time price changes
- Advanced security options to control sensitive operations
- Allows interface to 3rd party DVR for added security

Pay-at-pump fuel controller

Transactions completed directly at the pumps will integrate transparently with the in-store L-POS system. On-screen real-time display of the pump state gives operator full control over all pumps at all times.

- Integrated pump control with EMV certified Pay-at-Pump in Canada
- Support for unattended (Card lock) fuel sales
- Sell car washes at the pump
- Fully Automated fuel tank inventory control and reconciliation with automatic tank gauge or tank dips
- Back Office Fuel management

System interfaces

L-POS interfaces with forecourt controllers from leaders in the oil and gas business.

This ensures immediate compatibility with a wide range of devices and continuous development by industry experts in their respective fields.

- Allied Electronics ANDI controller
- Progressive International Electronics (PIE)

L-POS ties in to several popular fuel systems to offer best of class fuel management features.

- Sylogist-RMS GPI
- Boulder Logic SmartEcho
- MIDAX fuel control
- Enabler forecourt controller
